

# TANBOISÉ

Granulated tannin  
for white and red wines

## CHARACTERISTICS

TANBOISE' is a special blend of hydrolysable granulated tannins, brown coloured with an average astringent taste and woody aroma; TANBOISÉ is of medium solubilisation in water or wine. TANBOISÉ has a high surface electric charge.

## APPLICATIONS

TANBOISÉ can be used:

- on mash and on must for its antioxidant-antioxydasic effect. Its quick reaction with proteins deriving from the grape contributes towards reducing the utilisation of bentonite on the must
- in white, rosé and red wines, where it improves structure and has an antioxidant effect.

## DOSES AND INSTRUCTIONS FOR USE

5 - 15 g/hl according to the purpose (clarification, taste correction, colour stabilisation).

Dissolve the product in water or wine in a ratio of 1:10 and add it homogeneously to the mass.

NOTES: It is advisable to carry out some small tests in order to define the optimum dosage and avoid undesired colloidal effects.

## COMPOSITION

Mixture of hydrolysable tannins.

## PACKING

1 kg package, 10 kg bag

This product is not dangerous. No safety data sheet is required.
